Subject: [SPAM] Corporate Rule

Corporate Rule....

The DNC and RNC are corporations, and they are Political Parties. George Washington in his Farewell Address warned the public against Political Parties that would undermine free and fair elections. He couldn't have imagined the obscenity of corporations.

<http://reclaimdemocracy.org/corporate-accountability-history-corporations-us/>

Corporate-owned mainstream media are rising in Solidarity against the shutdown and negative comments from the Trump Administration against some news outlets. They raise their voices in defense of a Free Press, and say democracy is under attack due to exclusion of corporate-owned mainstream media pundits. One wonders where this so-called Free Press has been when they censored or propagandized about violations of human rights and environmental rights across the nation----

- * Censorship of environmentalists even to the lack of coverage for the NYS fracking ban
- * Coverage of violent confrontations in minority neighborhoods, but only cursory coverage of peaceful BLM protests
- * Censorship of protests anti-police-brutality protests overseas; an example being France now
- * Censorship about the declining wage scale across the U. S., as one hears corporate-owned mainstream media pundits articulate their glee in the rising stock market as being "the only thing I care about".....heard too often to ignore
- * Censorship of 3rd-Party politicians, regardless of the words of George Washing in his Farewell Address warning the public against Political Parties are being limiting to fair and free elections
- * Censorship about the harm inflicted upon environment and local communities by ubiquitous industrialization, in particular fracking and pipelines
- * Too many other examples to list, or one could go on for volumes.

The point is, one wishes for a Free Press to support democracy for We The People. The joke of corporate-owned mainstream media is that they do not fill these shoes well, use the U. S. Constitution for personal aggrandizement of their career choices, and in fact use their positions to promote the Capitalism that is counter to democracy.

And so, one again----<http://hmd.org.uk/resources/poetry/first-they-came-pastor-martin-niemoller>

That mainstream media have supported the 2-Party system, in what the 2-Parties have informed the U. S. electorate is the American system of elections, flying in the face of President George Washington to beware of Political Parties, and have censored Political Parties other than DNC and RNC, is a matter to be addressed to all 3 of corporate-owned mainstream media, RNC, and DNC, as to the reason they are actively undermining democracy by these activities.

What is the name for the active undermining of democracy in order to promote Capitalism? Is it Constitutional? One would be interested in a court judgment on this topic.

EcoWatch.....Too many excellent articles to choose just one----<http://us7.campaign-archive2.com/?u=214ab5fbb3f6015d74ffab4ec&id=0279d2710b&e=d4966762a5>

But if one were to choose just one article----<http://www.ecowatch.com/pruitt-lawsuit-epa-2282267844.html> -- This EPA lawsuit raises questions. If bureaucrats, politicians, Cabinet members, Presidents, or their families, derive personal profit from employment in the U. S. government, can We The People sue those characters for the harm they inflict on finances, rights, or the environment?

If governmental policy is put in place to promote Capitalists, and in so doing harm is inflicted on local communities and the environment without which people sicken and die, is this treason? To whom does The Economy belong? Are all U. S. citizens treated with equality and justice for all as pertains to The

Economy?

In Solidarity with Standing Rock water protectors----
